Backend	Node.js, Express.js, PHP, REST APIs, JWT authentication, Python basics
Data	PostgreSQL, MySQL, Prisma ORM, relational database design
Tools & practices	Git, GitHub, Vite, responsive design, accessibility, testing, Agile/Scrum

PROFESSIONAL EXPERIENCE

Frontend Web Developer
ZetaSynQ Solutions Co., Ltd.

01/2020 - 02/2023
Myanmar

- Developed and implemented a responsive employee-management web platform.
- Built dynamic user interfaces with JavaScript and PHP, translating business requirements into practical workflows.
- Integrated REST APIs to load, submit, and manage application data.
- Improved usability across screen sizes and continuously refined the user experience.
- Refactored frontend code into clearer, more maintainable structures and collaborated in an Agile environment.

SELECTED PROJECTS

Siang Photography Booking Platform

Full-stack

Business booking platform combining a polished public website with a protected administration area.

- Created booking, pricing, portfolio, and contact workflows connected to a live REST API.
- Built admin tools for bookings, customers, packages, images, payments, and delivery status.

Stack: React, Tailwind CSS, Node.js, Express, PostgreSQL, JWT [GitHub repository](#)

Online School Platform

Full-stack MVP

Role-based learning platform where teachers publish courses and students enrol, study, and track progress.

- Implemented secure student and teacher workflows with access and refresh-token authentication.
- Added course management, curriculum editing, lesson access, dashboards, progress tracking, and automated tests.

Stack: React, TypeScript, Express, Prisma, PostgreSQL, Vitest [GitHub repository](#)

SELECTED PROJECTS - CONTINUED

Cryptoverse

Frontend

Cryptocurrency dashboard for market statistics, ranked currencies, price history, exchanges, and news.

- Integrated third-party APIs and centralized application state with Redux Toolkit.
- Presented live market data through searchable lists, detail views, and charts.

Stack: React, Redux Toolkit, REST APIs, Chart.js, Ant Design [GitHub repository](#)

Car Rental Service

Work in progress

Responsive vehicle discovery and booking experience with authentication and CMS-managed car data.

- Developed vehicle catalogue, search, rental-date selection, and responsive layouts.
- Integrated Clerk authentication and GraphQL content from Hygraph.

Stack: Next.js, TypeScript, Tailwind CSS, Clerk, GraphQL, Hygraph [GitHub repository](#)
